

ADT

Square or rectangular ceiling diffuser types ADT are removable core 1, 2, 3 and 4 way discharge diffusers, ideal for flush mounting in ceilings. They are suitable for use in rooms with heights from 2.6 to 4 m. Ceiling diffusers can be used for both supply and extract air applications.

The removable blade core is mainly suitable for horizontal discharge.

Various border sections are available to cater for flush, recessed T-bar and tile clip fixing. Specially developed ancillaries and plenum boxes with optional flow rate control dampers are available to ensure optimum discharge characteristics.
